IRIS Release Notes

Version 5.1.1 – 11/21/2016

Pre-Arrival		
Description	Type	Ticket
eABN Travel Requirements and Travel Escort Subsequent eABNs with updated Travel Requirements and Travel Escorts will be saved. Previously, only data from the first eABN was saved.	Bug	150095
AOR Pre-Case Notes Bug Resolved issue where user received an error upon clicking the "Print Case Notes" button. Also made changes to the Case Notes report to reflect and properly restrict the ability to view data based on the "Restricted Medical?" and "Viewable by Affiliate?" fields that were added when the CAM/P3 AOR project went live on 9/17.	Bug	150603
"Received Approved AORs" Notification Improved Modified the "Received Approved AORs" notification to only show Lautenberg AORS. The processing of P3 and CAM AORs does not require the "received" step.	Bug	150399
"Travel Added" Notification Improved Adjusted the logic for the existing "Travel Added" notification so that a travel alert email is sent whenever a New Case is Assured that has previously-booked travel information. This action was taken because when a case that was previously allocated to one office and booked to travel was placed with a new office, the new office was not aware of the scheduled travel.	Enhancement	150295
AOR Enhancements Made the following improvements to the AOR module: 1. IRIS now adds only one "N/A" to the Name field on the printable DS forms rather than "N/A, N/A N/A". 2. IRIS now requires all fields to be entered in the sections where the user has the ability to mark all fields as "N/A." 3. Enlarged the "IRIS Pre-Case ID / Interest ID:" box a little bit on the Pre-Case Document Advanced Search screen so that the entire ID will now be visible. 4. On the AOR Submitted email notification, added the AOR Type to the Subject Line.	Enhancement	150287
Travel Tools for Affiliates Affiliates now have access to the following two travel tools: 1. Manage Travel module 2. Daily Travel Summary report	Enhancement	150285
Transfer Out Improved Functionality	Enhancement	149875

Pre-Arrival		
Description	Type	Ticket

Made the following changes to the Transfer Out functionality:
1. If a case is transferred out after it has arrived, IRIS will no longer remove the Arrival Date and travel data.
2. The following changes have been made to the transfer form that pops up upon initiation of a case transfer:
   a) The "From" RA will populate as display-only.
   b) The name of the person completing the form will appear in the "From" Name, but can be changed if needed.
   c) The "To" RA will remain a dropdown.
   d) The "To" Name will be an empty text field ready for data entry.
   e) Upon saving the form, IRIS will automatically add the RPC-required "agreed to transfer" statement to the Comments box.		

CAM AOR - Signature Tab Error Resolved issue where some affiliates were receiving an error when they clicked on the Signature tab, making it impossible for them to complete the CAM AOR and send it to the RA.	Bug	152000
Remove label "World Region" Removed "World Region" from Members background page. The label and field are placeholders, and no data is received or stored in the database for this field	Bug	150106
Add DOA Column to Cross Reference Tab Add a new column "DOA" (date of arrival) to the Cross Reference table	Enhancement	150050
BIODATA - Handle Special Characters Update logic on import and export process to handle umlauts or accented characters	Bug	146758
Sort Member Health Sort Member health page by Source Date descending to show latest entry first	Bug	150110
Transfer Interest Files Ability to transfer an Interest file within the same organization - affiliate to affiliate	Enhancement	150104
Case Notes Updated Access Logic RA has ability to view Affiliate "Case Notes" This is a configurable option depending upon Agency preference to have this ability or not	Enhancement	150051

Post-Arrival		
Description	Type	Ticket
RP Payment Receipts - Sort columns Sorting any column ascending/descending on RP Payment Receipts calculates the total amount twice	Bug	150043
Add new column to Minor Reports Notification New column "Affiliate" was added to all Pre and Post Minor reports notifications	Enhancement	150155
RP Period Report - Q2. Core Services change When Question #2 about whether or not all core services were completed is answered "Yes", the checkboxes remain active. These should all become inactive. Make them inactive but leave the comment box active. Comment box will not be required for "yes" answer but will remain required for "no" answer	Bug	150840
RP Period Report - Increase Core Service field size Update Core Service Comment field to varchar(4000) from 150 chars when Q2. Core Services = 'N'	Enhancement	150239
Case Transfer Screen - Abbreviation code Display abbreviation code instead of VOLAG ID to correctly display agencies name as well as VOLAG ID is limited to varchar(4) while abbreviation can handle up to 10 chars	Enhancement	147445
Add "Case Forms" to Non-Refugee cases Add Case Forms or attachment capability for Secondary Migrant when they are enrolled in non-refugee case	Enhancement	150047
Consolidate existing Assurance Reports Consolidate Several Existing Assurance Reports: • "Assured Unarrived Cases" and "Assured Unarrived Cases by Affiliate" into one single report • "Assured Cases" and "Assured Cases by Affiliate" into one single report	Enhancement	150099

Add new Assurance Standard reports
 	
Creation of new assurance reports to include statistics on length of time between assurance statuses. RAs want to be able to determine how many assurances are late, if late assurances typically occur in certain types of cases (i.e., minors, medicals), etc.
Assurance Reports:
   1.   Assurance by Affiliate
   2.   Assurance by Urgency
   3.   Assurance Received Summary
	Enhancement	149438
		149934

Matching Grant

Description	Type	Ticket
MG - Update join logic Currently, in IRIS an MG case can be joined if it is a hard cross reference. Update MG join logic to also include 'HTSR' type where the individuals travel together and can live in the same household or different	Enhancement	150275

Administration

Description	Type	Ticket
Improved Test Instance IP Address Management IP table will be stored in the IRIS file database so that updates to the Test DB do not remove saved IP addresses	Enhancement	150095
