IRIS Release Notes

5.3.2.10 – 08/26/2017

Pre-Arrival		
Description	Type	Ticket
NEW AOR Pre-Case Notes notification sort fix In the "NEW AOR Pre-Case Notes" notification, when a user clicked on any of the column headers in the grid, IRIS did not sort the records. That has been resolved.	Bug	164954
AOR Type filter added to three AOR notifications An AOR Type filter was added to the following notifications to allow users to select the type of AOR they wish to see in the results grid: 1. AORs Sent by Affiliates 2. AOR(s) Submitted to RPC/RSC 3. NEW AOR Pre-Case Note(s)	Enhancement	164952
Lautenberg AOR Marriages screen clarification Relationship was added next to the name in the Husband and Wife dropdowns on the Marriages tab to help the affiliate pick the correct person. This resolves an issue where when there was more than one person with the same name (ex: father and son), the user could not determine which one to pick from the dropdown.	Enhancement	164052
Lautenberg AOR Spouse functionality and verbiage change "Husband's Name" was changed to "Spouse 1's Name" and "Wife's Name" was changed to "Spouse 2's Name" in order to accommodate same gender marriages. Also, in each spouse dropdown, Anchor and all Anchor Family members (male and female) will now be included.	Enhancement	166989
AOR Minor Aging/Aged Out notification bug fixes Fixed several issues with the AOR Minor Aging/Aged Out notification.	Bug	163909
Case Transfer functionality modifications Modifications were made to the case transfer process. Highlights include: 1. The Transfer Date is now editable. 2. A copy of the Transfer Form is now added to the VOLAG Note that is created during a transfer. 3. When a case is Closed, the verbiage is now red in the header. 4. Transfer In and Out agencies will now display in the header in red. 5. Transfer Out information has been added to the Case screen.	Enhancement	162908

Pre-Arrival		
Description	Type	Ticket
6. Case transfers can now also be initiated from a case's Case and Member screens. 7. Transferred In and Transferred Out checkboxes have been added to the Advanced Search screen.		
"AORs Sent by Affiliate" notification modification When an AOR is in one of the Amend statuses, the value in the "Type" column will now be "Amended" rather than "Corrected."	Enhancement	162901
eABN/eDOM database change The eABN/eDOM import will now save Leg Number in the database for domestic flights. International Leg Numbers are already saved during imports. There will be no visible changes on any screens.	Enhancement	164302
Daily Travel Summary standard report change As was done in March 2017 for a case's Travel History screen, IRIS will no longer add unnecessary duplicate add/delete entries on the Daily Travel Summary standard report.	Enhancement	166104
Import "Affiliate Caseload Data File" Added a process to import the weekly RPC affiliate case load data file.	Enhancement	159235
Import AOR Letter Added the ability to split and import the RAVU, Discrepancy and DNA letters provided by RPC in PDF format. Note, the AOR letters provided by RPC do not follow a strict, rigorous naming convention or structure. IRIS searches the letters for information that may be used to split the letters by PreCaseID and also to match the letter with IRIS AORs. For this reason, there is a verification step before IRIS will upload the letter to the appropriate IRIS AOR.	Enhancement	162328

Post-Arrival		
Description	Type	Ticket
90 Day Follow-Up Suitability Assessment New 90 day follow-up suitability form will be available for cases that are arrived on or after 10/01/2017. **Note:** Effective date can be modified from IRIS Variables.	Enhancement	162794
90 day follow-up suitability form When new address is entered for the responsible adult on the 90th day report, it pulls and displays "State" from pre/post suitability form the moment 90th day form is saved. It should display the correct state instead of puling state value from pre/post suitability form.	Bug	162791

Administration		
Description	Type	Ticket
Custom Report IRIS_Individual Updated Corrected the issue of Address information missing entirely.	Bug	166068
Custom Report "Base" Category Issue Corrected an issue where users could save reports to the "Base" category. The Base category should only contain reports created by the IRIS Support Team.	Bug	165039
Custom Report Browser Issue Corrected an issue where Custom Reports functioning incorrectly with Google Chrome. Numerous additional bug fixes addressed also.	Bug	159996
Custom Report New Fields Added fields to IRIS_CASE data source that are new with the "Affiliate Case Load Report". 1. OrientationHour_Code 2. OrientationHour 3. MustTravelBy 4. TravelStatus_Code 5. TravelStatus	Enhancement	159235
