IRIS Release Notes

5.3.5.8 – 02/12/2018

Pre-Arrival		
Description	Type	Ticket
eABN/eDOM Timestamp Issue Changed eABN/eDOM code to subtract an hour from the timestamp that IOM passes to IRIS during a data retrieval. This was necessary to accommodate a situation on IOM's servers were sometimes the timestamp is in UTC time and other times it is in Geneva time. This will prevent missing data when/if the eABN/eDOM process encounters an error and has to launch into GetByTimeStamp.	Bug	176530

Custom Report		
Description	Type	Ticket
Add Field 'Processing OPE' to IRIS_CASE Processing OPE field from the Pre-Arrival screen.	Enhancement	177905
