Bug and Minor Improvements Custom Field Maintenance Fixed broken image link	Bug	175924

Custom Field Maintenance Minor Improvements
 	
1. Rename button: Refresh Schema to "Save Updates"
2. Improved warning message to "Saving updates and generating XML is a time consuming process. It may impact other user's productivity. Do you want to continue?"
3. Updated button label to "Refreshing Scheme is in progress" to "Saving updates is in progress"
4. Revised Add Lookup Value Workflow
   a. Step 1: Add Lookup Type [no change]
   b. Step 2: Manage Lookups [no change]
   c. Step 3: Add Look up Value
   d. Update so that clicking the Save button saves, shows a message "Lookup value saved", then presents user with new data entry form. Currently, the pop-up form closes and user needs to click Manage Lookup Values again.
5. Updated so that after clicking the Save button from the Add Custom Field screen, the pop-up window closes. The main window updates to show that the field was added.
6. Updated so that after clicking the Remove button from the Add Custom Field screen, the pop-up window closes. The main window updates to show that the field was removed.
