IRIS Release Notes
5.4.1.2 – Released 6/18/2018

Pre-Arrival		
Description	Type	Ticket
Travel – Case Processing Status Modified the travel code to change Case Processing Status back to Scheduled to Travel if changes to a flight cause the Confirmed Arrival Date to be in the future.	Enhancement	185031

Matching Grant		
Description	Type	Ticket
Updated MG File Export Fixed a bug that was causing the export to fail if there were no cases within the start and end period of the requested export.	Bug	185047

Reports		
Description	Type	Ticket
Update Custom Report IRIS_CASECROSSREFERENCE If the cross refenced case has arrived, then the IRIS cross reference screen will show the cross referenced case size from the BioData of the cross referenced case if it is imported to IRIS. The cross referenced cases BioData may differ from the information in the original case. The custom report was updated to be consistent with the IRIS screen. Previously, the custom report showed what was in the original cases cross reference table as imported from BioData or edited by a user.	Enhancement	185122
Update Custom Report IRIS_CASECROSSREFERENCE Add fields: CaseNumberFrom CaseCrossReferenceOid AffiliateTo CaseNumberTo Remove fields: Case_PrefixCode Case_Number Case_Suffix	Enhancement	185122
