IRIS Release Notes

5.7.2.2b – Released 1/3/2020

Matching Grant		
Description	Type	Ticket
MG Data File Export (1/3) Export file field EligibilityDate was incorrect for some case types. IRIS screens and MG PPR allow the configuration of case types applicable to using enrollment date vs arrival / eligibility date to calculate 120/180 dates. The export previously was using hard coded case types rather than the configured values.	Bug	231202
