# IRIS Release Notes

6.0.7.1 – Released 4/9/2021

| Pre-Arrival | | |
|---|---|---|
| Description | Type | Ticket |
| **Lautenberg AOR PDF Auto-save**<br><br>Corrected a bug with the PDF created automatically. The bug affects only Lautenberg AORs and only on the auto-created PDF. The print button PDF was not impacted by this bug. | Bug | 272372 |
| **Updated Tracking of START Cases**<br><br>WRAPS cases have an RPC version number of 001. START cases have a version number of 002. The version number is saved in IRIS during a BioData import. However, when RPC migrated cases from WRAPS to START, IRIS does not have an indictor that it is a START case. This update will check daily for refugee cases with an 8 digit case number and set the version number to 002 so version will accurate indicate START vs WRAPS cases. | Enhancement | 273226 |

| Post-Arrival | | |
|---|---|---|
| Description | Type | Ticket |
| RP Period Report Export Update for START Cases<br><br>Per RPC requirements, WRAPS and START exports of the R&P Period Report data will be sent in separate emails. One email for WRAPS and one email for START. | Enhancement | 272725 |
