IRIS Release Notes v.6.8.0

August 21st, 2023

Enhancements

Request ID	Subject	Category
354489	Biodata Upload Process Update	Pre Arrival
In response to modifications by RPC process where they no longer provide a reference code for removed US Ties, the logic in the Biodata upload process was modified to continue to mark removed US Tie as *Removed* in IRIS.		
354609	GeoMatch Export Additions	Administration
Added additional data points to the existing GeoMatch export file to for additional analysis.		
355033	Add BID/ADL Medical Form Upload Process	Pre Arrival
Added the functionality when *BID* or *ADL* file is uploaded via *WRAPS Medical Forms* option within *START Import* module of IRIS a case note will be uploaded to respective case/individual automatically.		

Bug Fixes

Request ID	Subject	Category
353974	Print Biodata Displaying Removed Items	Pre Arrival
Corrected an issue where when a case had health Information removed in IRIS it would still display when the Biodata was printed. JIRA Ticket Reference: AP-5498		
355721	Unable to Assure Case	Pre Arrival
Corrected an issue where certain RA's would receive an error when attempting to assure a case or in some instances creating a new US tie.		
355773	Biodata Upload Error	Pre Arrival
Corrected an issue where certain RA's were unable to upload Biodata after the Biodata upload logic was updated.		
355972	AOR History Missing Details	Pre Arrival
Corrected an issue where AOR history wouldn't display the *Reason* surrounding a Closure even though it had been properly entered.
