

# IRIS Release Notes v.6.8.1

September 19<sup>th</sup>, 2023

## Enhancements

Request ID	Subject	Category
357323	Biodata Print Update	Pre Arrival
Added the Pre-Case Type and Pre-Case Subtype fields on the Print Biodata pdf report.		
357513	eIRIS API Update	Administration
Added PreCaseType and PreCaseSubType values in eIRIS API schema. This was to assist in identifying qualifying ERMA program cases.		
357551	Update Waiver/Inactivation Email Template	Pre Arrival
Now when RA's will <i>Waive</i> or <i>Inactivate</i> an Assurance the email notification generated and sent to the RPC now will append the Case Number to the Email Subject for easier identification purposes.		
357580	Cultural Orientation Due Dates – Walk in Cases	Post Arrival
Modified the logic surrounding the <i>Individual CO Compliance/Assessment Due/Overdue</i> & <i>Case CO Assessment Due/OverDue</i> so Walk in cases (Post Arrival SIV) will be calculated from the Assurance Date.		
357661	MG Financial Tracking	Matching Grant
Added a new column on <i>MG Finances Tab</i> , labeled <i>Reason for Payment</i> , this new field displays the values that are entered in the <i>Reason for Payment</i> field by affiliate when adding a payment.		

## Bug Fixes

Request ID	Subject	Category
356469	Biodata Upload Error	Pre Arrival
Corrected an issue stemming from new cross reference logic in Biodata upload process that was causing an upload error reading "Object reference not set to an instance of an object."  JIRA Ticket Reference: <a href="#">AP-5714</a>		
357521	New AOR Stage Errors Upon Creation	Pre Case
Corrected an issue where certain users would receive an error while attempting to create a New Stage, by adding logic to account for nulls.  JIRA Ticket Reference: <a href="#">AP-5784</a>
